SUMMARY

Full-stack developer skilled in Next.js, React, TypeScript, Node.js/Express, and MongoDB. Built and deployed BookNook, a library management app with JWT-secured REST APIs, Better Auth login, and race-condition-safe borrow/return logic. Seeking a junior developer role.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frontend: React, Next.js (App Router), Tailwind CSS, shadcn/ui, Framer Motion, Swiper
Backend: Node.js, Express.js, RESTful APIs
Database: MongoDB
Authentication: JWT, JWKS, Better Auth, Google OAuth
Tools & Deployment: Git, GitHub, Vercel, npm, ESLint
Concepts: Responsive Web Design, REST API Design, Authentication & Authorization, Client-Server Architecture

PROJECT

BookNook: Full-Stack Library Management App | Live Demo | Client Repo | Server Repo
Next.js 16, React 19, TypeScript, Tailwind CSS, shadcn/ui, Framer Motion, Node.js, Express, MongoDB, Better Auth, JWT (JWKS), Vercel

- Built a full-stack library app where users sign in with email or Google (Better Auth) to add, edit, delete, search, and filter books, with image upload via imgbb.
- Secured a REST API (Express, MongoDB) by verifying Better Auth JWTs against a JWKS endpoint, with owner-only and borrower-only access rules on update, delete, and return routes.
- Implemented atomic borrow/return logic with live copy tracking, using a unique partial index to reject duplicate borrows by the same user.
- Designed a responsive UI (phone to desktop) with dark/light themes, loading/empty/error states, and Framer Motion animations; deployed both client and API on Vercel.

EDUCATION

B.S.S. (Honours) in Economics, National University — Expected 2029

COURSES

Complete Web Development Course, Programming Hero — 2026

LANGUAGES

Bangla (Native), English (Elementary)
